

Presenting
SMARTILE®
affordable • unique • beautiful

**AN INNOVATIVE
BREAKTHROUGH LIFTS
IMAGE OF FLOOR GRATES
TO A NEW FOCUS
IN DECOR.**

A beautiful alternative to the traditional floor grate SMARTILE® allows water to drain around its perimeter and into SMARTWASTE® or a 100mm pipe below, also suitable for renovators.

This new improved version of the popular earlier version has an adaptor that provides support and alignment for the 316 stainless steel surround frame and lift out tile tray.

SMARTRAP®

SMARTRAP®
under
concrete
floor

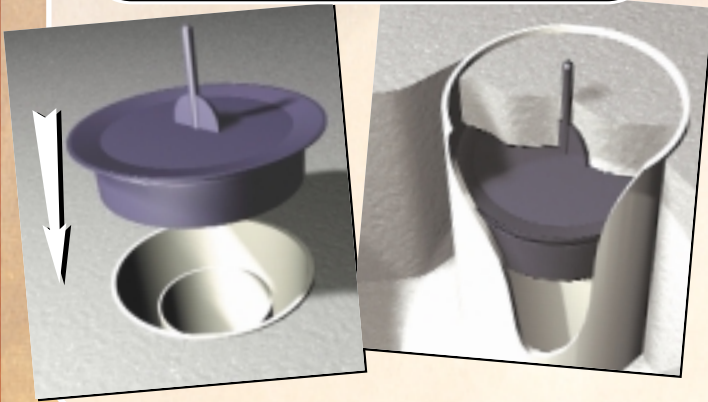

**A new
floor waste
gully trap
launched at
Interbuild 2001**

with an amazing
space-saving design
reducing underfloor
depth by up to 75%.

SMARTRAP® is self-cleaning
and can be installed in the
traditional way. Depth under a
concrete floor may be reduced to an
incredible 75mm by installing the optional
SMARTCAP® creating a cavity in the concrete
for the "trap" part of the SMARTRAP®.

SMARTPLUG

**A flexible plug preventing
pipe blockages during construction.**

Cement and debris may be broken up and removed; the flexible SMARTPLUG is easily drawn out through the grate when all work is finished. The SMARTPLUG is inserted into the pipe - supported at a suitable height by a piece of pipe. A floor grate may be installed and tiling completed. Also prevents even liquid cement from entering drain.
