

NEW!

A Revolution in Plumbing Technology!

BUILDER • PLUMBER • TILER • CONCRETER • HOMEMAKER

Reduces leaks dramatically

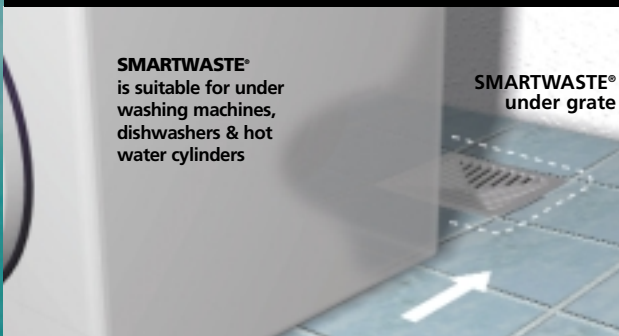

Allows flexible positioning for grates and waste outlets

This new plumbing product - a large dish drain below floor level - eliminates leaks around grates, **avoids flooding** from appliances, allows grates to be **symmetrically positioned** in tiled floors, **simplifies installation** of baths and shower trays, and **eliminates riser pipes** above the floor slab during construction.

Approved with the 'WaterMark', the **SMARTWASTE**® is a 350mm moulded plastic floor waste, made from ABS, with a 15mm compressed fibrous cement lid and fibreglass mat for reinforcing waterproof membrane.

A **support stand** stabilises the **SMARTWASTE**®, and allows for vertical height adjustment, can assist in **termite prevention** and can accommodate a **fire collar** for use in multi-storey construction.

FLOODING is prevented from appliances should hoses fail

SMARTWASTE® is suitable for under washing machines, dishwashers & hot water cylinders

SMARTWASTE® under grate

SMARTCOLLAR®

A termite barrier and a support stand for SMARTWASTE™ and SMARTPAN™

The Smartcollar also acts as a support stand on slabs on the ground.

On suspended slabs it is nailed to the formwork and can accommodate a fire collar.

CSIRO App#264

LEAKS around grates are eliminated

Position grate wherever you want!

Drill your holes wherever you need to!

Fibro lid
(supplied, including fibreglass reinforcing mat)
